BUREAU OF LABOR STATISTICS

U. S. DEPARTMENT OF LABOR

For Release: Wednesday, May 15, 2019

19-30-CHI

MIDWEST INFORMATION OFFICE: Chicago, Ill.

Technical information: (312) 353-1880 BLSInfoChicago@bls.gov www.bls.gov/regions/midwest

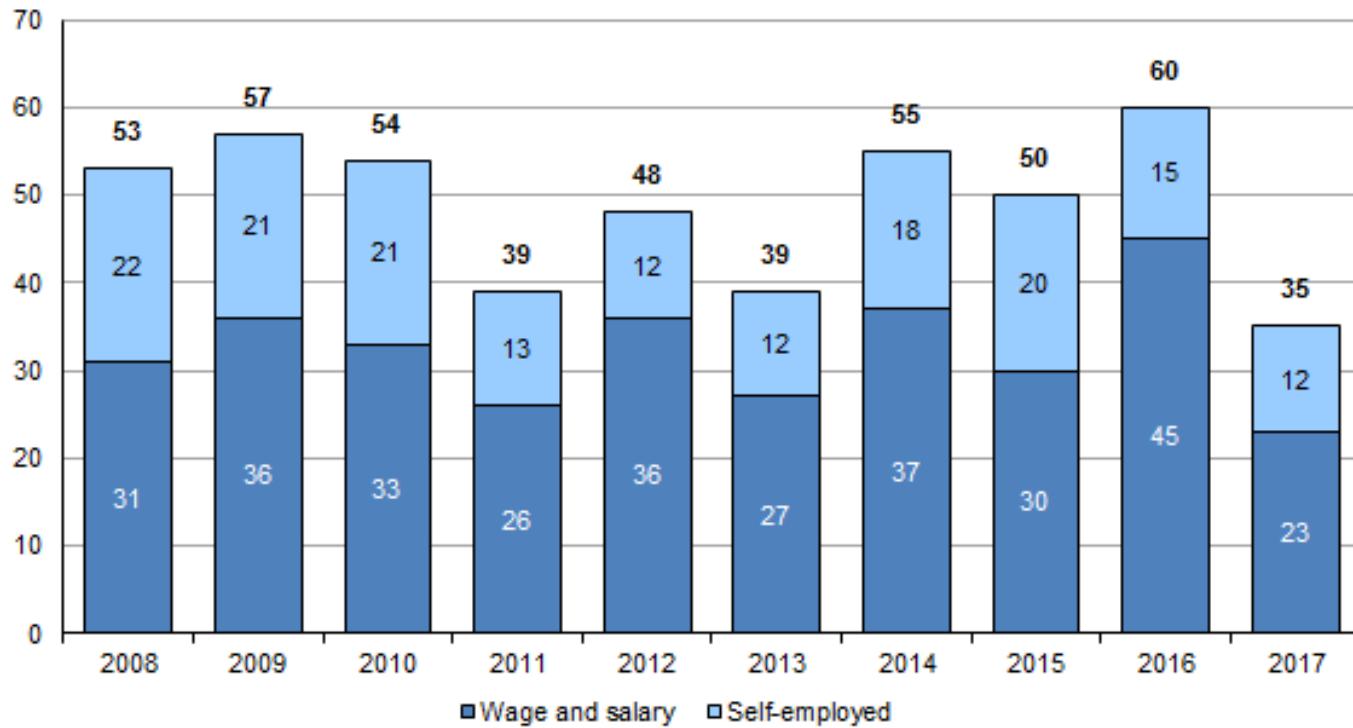

Media contact: (312) 353-1138

## Fatal Work Injuries in Nebraska — 2017

Fatal work injuries totaled 35 in 2017 for Nebraska, the U.S. Bureau of Labor Statistics reported today. Assistant Commissioner for Regional Operations Charlene Peiffer noted that the number of work-related fatalities in Nebraska decreased from 60 in the previous year. Fatal occupational injuries in the state have ranged from a high of 83 in 1994 and 2002 to a low of 35 in 2017. (See [chart 1](#).)

Nationwide, a total of 5,147 fatal work injuries were recorded in 2017, down slightly from the 5,190 fatal injuries reported in 2016, according to the results from the Census of Fatal Occupational Injuries (CFOI) program.

**Chart 1. Total fatal occupational injuries, Nebraska, 2008–2017**

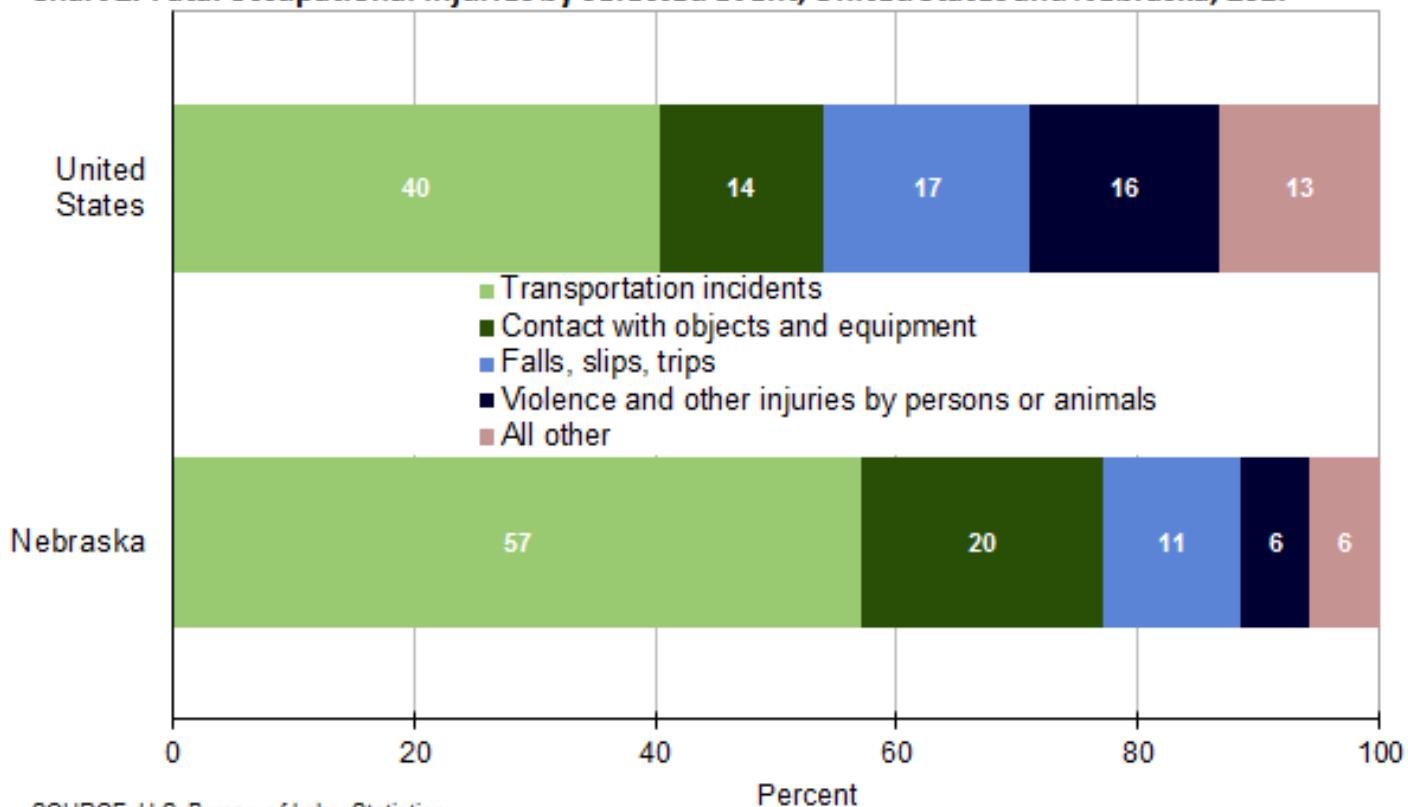

SOURCE: U.S. Bureau of Labor Statistics.

### Type of incident

In Nebraska, transportation incidents resulted in 20 fatal work injuries, accounting for 57 percent of all workplace fatalities in the state. (See [table 1](#).) The number of worker deaths from transportation incidents decreased by 16 over the year. Fatalities from contact with objects or equipment resulted in seven workplace deaths, a decrease of two from the previous year.

Nationally, transportation incidents were the most frequent fatal workplace event in 2017, accounting for 40 percent of fatal work injuries. (See [chart 2](#).) Falls, slips, or trips was the second-most frequent type of event (17 percent), followed by violence and other injuries by persons or animals (16 percent) and contact with objects and equipment (14 percent).

SOURCE: U.S. Bureau of Labor Statistics.

## Industry

The private agriculture, forestry, fishing, and hunting industry had the highest number of fatalities in Nebraska with 12, a decrease of 6 from the previous year. (See [table 2](#).) Transportation incidents were the most frequent fatal event in the industry with six worker deaths, followed by contact with objects or equipment with five fatalities. The crop production sector accounted for nine, or 75 percent of the fatal injuries in this industry.

The private transportation and warehousing industry had five workplace fatalities, a decrease of three from the previous year. All of the fatalities in this industry occurred in the truck transportation sector.

## Occupation

The management occupational group and the transportation and material moving occupational group had the highest number of workplace fatalities with eight and seven each, respectively. (See [table 3](#).) Farmers, ranchers, and other agricultural managers accounted for six of the fatalities in the management group; heavy and tractor-trailer truck drivers suffered six of the fatalities within the transportation and material moving group.

## Additional highlights

- Men accounted for 33 or 94 percent of the work-related fatalities in Nebraska, similar to the 93-percent national share. (See [table 4](#).) Transportation incidents made up 61 percent of the fatalities for men in Nebraska.
- White non-Hispanics accounted for 77 percent of those who died from a workplace injury. Nationwide, this group accounted for 67 percent of work-related deaths.

- Workers who were 55 years of age and older accounted for 60 percent of the state's work-related fatalities in 2017, compared to 37 percent of on-the-job fatalities nationally.
- Of the 35 fatally-injured workers in Nebraska, 66 percent worked for wages and salaries; the remainder were self-employed. The most frequent fatal event for both groups was transportation incidents.

## Technical Note

**Background of the program.** The Census of Fatal Occupational Injuries (CFOI), part of the BLS Occupational Safety and Health Statistics (OSHS) program, compiles a count of all fatal work injuries occurring in the U.S. during the calendar year. The CFOI program uses diverse state, federal, and independent data sources to identify, verify, and describe fatal work injuries. This ensures counts are as complete and accurate as possible. For the 2017 national data, over 23,400 unique source documents were reviewed as part of the data collection process. For technical information and definitions for CFOI, please go to the BLS Handbook of Methods on the BLS website at [www.bls.gov/opub/hom/cfoi/home.htm](http://www.bls.gov/opub/hom/cfoi/home.htm).

**Federal/State agency coverage.** The CFOI includes data for all fatal work injuries, even those that may be outside the scope of other agencies or regulatory coverage. Thus, any comparison between the BLS fatality census counts and those released by other agencies should take into account the different coverage requirements and definitions being used by each agency. More on the scope of CFOI can be found at [www.bls.gov/iif/cfoiscope.htm](http://www.bls.gov/iif/cfoiscope.htm) and [www.bls.gov/opub/hom/cfoi/concepts.htm](http://www.bls.gov/opub/hom/cfoi/concepts.htm).

**Acknowledgments.** BLS thanks the Nebraska Workers' Compensation Court for their efforts in collecting accurate, comprehensive, and useful data on fatal work injuries. BLS also appreciates the efforts of all federal, state, local, and private sector entities that provided source documents used to identify fatal work injuries. Among these agencies are the Occupational Safety and Health Administration; the National Transportation Safety Board; the U.S. Coast Guard; the Mine Safety and Health Administration; the Office of Workers' Compensation Programs (Federal Employees' Compensation and Longshore and Harbor Workers' Compensation divisions); the Federal Railroad Administration; the National Highway Traffic Safety Administration; state vital statistics registrars, coroners, and medical examiners; state departments of health, labor, and industrial relations and workers' compensation agencies; state and local police departments; and state farm bureaus.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Struck by powered vehicle--nontransport .....	--	4	11

## Footnotes:

(1) Based on the BLS Occupational Injury and Illness Classification System (OIICS) 2.01 implemented for 2011 data forward.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

## Footnotes:

(1) Industry data are based on the North American Industry Classification System, 2012.

(2) Includes fatal injuries to workers employed by governmental organizations regardless of industry.

NOTE: Data for all years are final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. CFOI fatality counts exclude illness-related deaths unless precipitated by an injury event. Dashes indicate no data reported or data that do not meet publication criteria.

**Table 3. Fatal occupational injuries by occupation, Nebraska, 2016–17**

Occupation <sup>(1)</sup>	2016	2017
